UX DESIGNER AND RESEARCHER - NOT SIMPLIFYING, BUT BRINGING CLARITY INTO COMPLEX WORKFLOWS.

I have 7+ years of experience working in early stage start-ups and global-agile product teams. I have diverse experience working with SaaS and B2C products. I'm interested in bringing clarity to complex workflows and interfaces; not just simplification.

PROFESSIONAL EXPERIENCE

NetElixir Digital Solutions

Hyderabad, Telangana

Lead Product Designer

08/2025 - Present

- I'm leading a small team to understand the workflows and eco-system of performance marketing managers and e-commerce marketing strategists/analyst. We've designed for adoption of AI solutions into their workflows. I've also worked on making it easy for marketers to think in novel ways of marketing, like strategic experimentation and predictive intelligence that the product offers.
- I've also worked with PMs and Engineers to explore new product directions with LXR Sense & LXR Sherpa, which are AI tools for the marketing eco-system.

Mediyum Design Studio

Panjim, Goa

Sr. UX Designer and Researcher

01/2020 - 08/2025

- I've worked in multiple domains like cyber-security, customer support and ed-tech in B2B SaaS and consumer products.
- Led a small team to bring clarity into complex cyber-security workflows in Indusface. This clarity opened the product to global markets. An improved visibility of the system status scaled the product significantly, as it allowed customers to self-service and manage key use-cases without reaching out to their relationship managers.
- I've worked with founders and designed MVPs for *Workomo*, *Capshine*, *JoveCoachAI* and *HumangoAI*. We gained insights into the product's ecosystem by rapidly prototyping explorations and testing the hypothesis. These insights gave direction to the product.
- I was part of the *AI-traid* team at *Helpshift*. We increased the adoption of ML/AI features by identifying opportunities in the customer journey. This improved adoption significantly every quarter.

Freelance

Delhi, Delhi

UX Researcher

06/2019 - 12/2019

- I've consulted with Mediyum and Treemouse (NID Alumni Design Studios); where I've designed, planned and conducted User Research for edu-tech & fin-tech startups.
- These insights influenced product design and marketing the product.

Better by Design

Hyderabad, Telangana

Experience Designer

05/2018 - 02/2019

- I played a pivotal role in creating game-like and narrative-driven experiences for students in design thinking.

EDUCATION

National Institute of Design

Gandhinagar, Gujarat

Masters in Design, New Media Design

06/2013 - 12/2017
